Secure your property remotely

With **PowerHome**, there's no more turning back to make sure the doors are locked or rushing home to let someone in. **PowerHome** lets you remotely monitor and control your locks so you can constantly stay aware and be empowered to take action from anywhere.

PowerHome

makes it easy for you to lock or unlock a door remotely, or even better, create a lock access code for anyone who needs access to your property; you'll be alerted immediately via text or email when someone unlocks a door.

Toss out the keys

PowerHome lock control means you don't have to give out keys to all the people who are authorized to enter your property?—?like your housekeeper, dog walker, or babysitter?—?and then worry about getting the keys back later. It's easy to grant a new visitor access without having to run to the hardware store for a key copy?—?just go to our website or sign in to your account from your mobile device.

Greater convenience and control

PowerHome lock control is fully integrated with your Alarm Depot security system, making it easy to manage your security system and lock users in one place. This integration allows for your security system to be automatically armed or disarmed after the door is locked or unlocked, respectively. Keep track of all the activity that happens at your property after the door is unlocked using Alarm Depot-enabled sensors, motion detectors and video cameras.
